

Shukhrat Malikov

Frontend Developer — React, Next.js, React Native, TypeScript

Frontend developer with 4 years of commercial experience in React, Next.js, React Native and TypeScript. I build the frontends of Uzbekistan's national science and innovation platforms and own the full path to production: component architecture from Figma, API integration, SSR and SEO, then deployment with Docker, nginx and CI/CD. AI-assisted engineering with Claude Code and MCP is part of my daily workflow.

Feb 2025 – Present

Frontend Developer

Innovation Development Agency | Tashkent, Uzbekistan

Government agency under the Ministry of Higher Education, Science and Innovation. Frontend of the national science and innovation ecosystem (ilmiy.uz): public portals, personal cabinets and admin panels for researchers, universities and state bodies.

- Build and maintain the frontends of 9 production platforms with React, Next.js and TypeScript, from project setup and architecture to release and support.
- Turn Figma designs into responsive, accessible, multilingual interfaces; built shared component libraries on shadcn/ui, Radix UI, Ant Design and Tailwind CSS with design tokens, so new pages are assembled from ready blocks.
- Design the data layer on TanStack Query, Redux Toolkit, Zustand and Axios: typed API clients from Swagger/OpenAPI, JWT refresh interceptors, caching and invalidation, pagination, optimistic updates, unified error handling.
- Build complex forms with React Hook Form and Zod/Yup (multi-step flows, dynamic fields, draft persistence, unsaved-changes guards) and analytics dashboards with Recharts and Ant Design Charts.
- Deliver SSR and SEO: Next.js App Router and Vite SSR on Express, metadata and Open Graph, sitemaps, Google Analytics, code splitting and lazy loading for a fast first load.
- Own deployment: Docker and Docker Compose, nginx reverse proxy, PM2, CI/CD in GitHub Actions (self-hosted runners inside a closed network) and GitLab CI, separate dev, staging and production environments on Ubuntu servers.
- Introduced an AI-assisted workflow: Claude Code with project rules, skills and MCP integrations for Figma and Linear across triage, planning, implementation and review; built the UI for AI features such as AI-generated text detection.

Platforms

id.ilmiy.uz — single sign-on for the ecosystem

anticopy.uz — plagiarism and AI-text detection

internship.ilmiy.uz — research internships

etaqriz.uz — electronic peer review

akadem.ilmiy.uz — academic mobility programme

innowebk.uz — InnoWeek innovation week

slib.uz — national scientific e-library (SSR)

tripogram.uz — tour search and online booking

Journals platform — scientific journals on Next.js

Dec 2023 – Jan 2025

1 year 2 months

React / React Native Developer

Softwhere | Tashkent, Uzbekistan | softwhere-uz-86ky.vercel.app

Software company: web and mobile apps built from scratch, plus new features for products in development.

- Developed web apps with React and cross-platform mobile apps with React Native and Expo, from an empty repository to a production release.
- Delivered CRUD features end to end against the backend API using React Query, Redux Toolkit and MobX; added real-time updates over WebSocket.
- Worked with the backend team to stabilise the API contract, which made frontend integration faster and more predictable.
- Fixed critical design, functionality and performance bugs and tested every release, shortening the path to production.

Stack: React Native, Expo, React, TypeScript, Redux Toolkit, MobX, React Query, MUI, Tailwind CSS, WebSocket

React / React Native Developer

Empire Soft | Tashkent, Uzbekistan | empire-soft.net

E-commerce products: online store applications for web, iOS and Android.

- Developed an online store application for iOS and Android with React Native and Expo: catalogue, search, cart and checkout flows.
- Designed the project structure and set up ESLint rules to keep the codebase clean and maintainable.
- Built reusable UI components and state management with React, Redux Toolkit and MobX.
- Proposed new features, took part in planning and technical decisions, and resolved bugs to keep shopping smooth for users.

Stack: React Native, Expo, React, TypeScript, JavaScript, Redux Toolkit, MobX, Axios, Tailwind CSS, ESLint

Own project

Uslub AI AI stylist mobile app. Built the React Native CLI client with Zustand and TanStack Query; the architecture lets the whole app run on mock data, so the product is tested end to end before the AI backend goes live.

Skills

Languages	TypeScript, JavaScript (ES2015+), HTML5, CSS3, SCSS
Web	React 18/19 (Hooks, Context, Suspense, custom hooks), Next.js (App Router, SSR, SSG, ISR, Metadata API), Vite, Vite SSR with Express, React Router v7, Node.js
Mobile	React Native (CLI and Expo), EAS Build and Submit, React Navigation, App Store Connect and TestFlight, Google Play releases, Sign in with Apple, Xcode, Android Studio
UI libraries	shadcn/ui, Radix UI, Ant Design, Material UI (MUI), Tailwind CSS, Bootstrap, CSS Modules, responsive and adaptive layout (Flexbox, Grid), theming and dark mode, design tokens, accessibility (a11y)
State and API	Redux Toolkit, Redux Persist, Zustand, MobX, Context API; TanStack Query / React Query (caching, invalidation, prefetching, infinite queries, optimistic updates); Axios (instances, interceptors, token refresh, cancellation), Fetch API, REST API, WebSocket, Swagger / OpenAPI, Postman, JWT, OAuth 2.0, Firebase, Supabase
Forms, charts, i18n	React Hook Form, Zod, Yup (multi-step and dynamic forms, schema validation, draft persistence); Recharts, Ant Design Charts; i18next / react-i18next
SEO and speed	SSR / SSG, Metadata API, react-helmet-async, Open Graph, sitemap generation, Google Analytics 4, code splitting, lazy loading, memoisation and render optimisation
Architecture	Feature-based structure, reusable component libraries, custom hooks, typed API layer, ESLint, Prettier, Conventional Commits, code review
DevOps	Docker, Docker Compose, nginx (reverse proxy, static and SSR hosting), PM2, GitHub Actions (self-hosted runners), GitLab CI/CD, Linux (Ubuntu) servers, SSH, Vercel, MinIO (S3 storage), dev / staging / production environments
Backend	Python (Django, FastAPI), Go, Node.js (Express), PostgreSQL, Redis
AI engineering	Claude Code (skills, plugins, CLAUDE.md project rules), MCP integrations (Figma, Linear), prompt engineering, AI-assisted planning, debugging and code review, building UI for LLM-powered features
Tools	Git, GitHub, GitLab, Figma (Dev Mode), Linear, VS Code, npm, yarn, pnpm

Education

Tashkent State Transport University, Bachelor's degree, Electrical Engineering (Networks), 2019 – 2023

Languages

Uzbek native, English Upper-Intermediate (B2), Russian basic
